SME's

egoprise uses eGovernment to make public administrations more customer-focused.

Rural businesses have improved access to the labour market throughout the Baltic Sea region.

SME's boost their innovative capacity by networking with research establishments.

egoprise supports the integration of small and medium-sized enterprises in public networks and company clusters.

eGovernment helps companies save time and money.

POLITICIANS

egoprise makes public administrations more efficient.

Readily accessible public administrations promote business enterprise in the countryside.

Customer-oriented eGovernment can strengthen a region's economic performance.

PUBLIC ADMINISTRATIONS

egoprise helps public administrations to develop customer-friendly processes.

eGovernment optimises the work of public administrations and helps them save time and money.

eGovernment frees up additional capacity for new and better services.
